Optoelectronic level switch For sanitary applications Model OLS-F1

WIKA data sheet LM 31.05

Applications

- Food and beverage production
- Pharmaceutical industry, biotechnology industry, production of active ingredients
- Aseptic applications

Special features

- Autoclavable
- Compact design
- No moving components
- Mounting position as required
- Accuracy ±2 mm

Optoelectronic level switch with circular connector M12, model OLS-F1

Description

The model OLS-F1 optoelectronic level switch is used for monitoring the level of liquids in sanitary applications. The optoelectronic sensor consists of an infrared LED and a light receptor.

The light from the LED is directed at a prism which forms the tip of the sensor. So long as the tip is not immersed in liquid, the light is reflected within the prism to the receiver.

When the liquid rises within the vessel and surrounds the tip, the light beam is refracted by the liquid, so that the receiver is no longer or only weakly reached by the light and reacts to this change by triggering a switching operation.

The OLS-F1 optoelectronic sensor has been specifically designed for sanitary applications and is suitable for a wide range of applications. Autoclavable applications can be performed up to a temperature of +134 °C.

Specifications

General data	
Measurement accuracy	±2 mm
Minimum distance from the glass tip to an opposite surface	≥ 10 mm ≥ 20 mm with electropolished surface
Mounting position	as required
Insertion length EL	Standard: 30 mm, max. 300 mm other lengths on request
Process connection	Clamp connections: 3/4" 1" 1 1/2" Others on request
Surface	R _a < 0.8 μm

Design data	
Responsiveness	Preset for the detection of aqueous media
Medium temperature	-30 +100 °C autoclavable, max. 134 °C at saturated steam conditions
Ambient temperature	-25 +70 °C
Operating pressure	0 2.5 MPa (0 25 bar)
Materials Light guide Case und process connection 	Quartz glass, fixed with epoxy resin Stainless steel 1.4435

Electrical data	
Power supply	DC 12 32 V
Max. current supply	40 mA
Electrical connection	M12 x 1 circular connector, 4-pin
Output signal	PNP transistor, protected against reverse polarity, 200 mA switching current
Switching function	Normally open (closed in medium) or normally closed (open in medium)
Ingress protection	IP65 with connector IP69K with protection cap
Number of switch points	1

Switching delay of up to 7 s on request

Options

Other versions on request

Dimensions in mm

Protection cap for circular connector M12 x 1
